SEED

Catalog

# Another Big Farm Year Ahead

weather permitting. The critical International situation and therefore larger standing Army, Navy and Air Force are creating a need for more of almost everything, at relatively high prices.

There is ample evidence to show that legume-grass pastures can produce gains at less than half their cost in hay or silage and less than one-third their cost in grain.

Some seed is substantially lower priced than a year ago and only a few items because of unfavorable season and small yields are higher. You can save money buying from us as soon as possible after receiving this 1951 catalog. Prices are subject to market changes after February 1, 1951.

Bober's Hardy Seed, grown in the higher altitude of the Northern foothills of the Black Hills and in eastern Montana, possess **more disease resistance, drought resistance and best yielding ability**, than seed grown in sections with less rigorous climatic conditions. They also bring you the added vim and vigor of our Pierre Clay virgin soils, which have tracer elements, not found in older farming areas.

If you had to pay twice as much for Bober's Seeds you would still be ahead because of its hardiness and better yielding ability, but instead, you actually save money by paying "direct to you" prices listed in this catalog.

Sincerely yours,

Sam H. Bober & Sons

Stop in to visit us when on your vacation trip. We are located in Rapid City, S. D., the gateway to the beautiful Black Hills. Stop in to see our modern Seed House where most up-to-date cleaning and processing machinery is used to produce top quality seed, free from foul weeds, of highest purity and highest germination.

**Our Alfalfa Seed Grows in Every State in the Union**

## TERMS OF SALE AND SHIPMENT

**Payment:** Cash in full with order. Money order, bank draft or check on good bank. We ship promptly on receipt of your order. All items are priced f.o.b. Rapid City, except garden seeds, which are prepaid.

## PLEASE ORDER ALL FIELD SEED AT ONCE

Help us, yourself, and the railroads, by letting us fill your order in midwinter when transportation is not crowded and when help is easier to get.

## YOUR COOPERATION WILL BE APPRECIATED

**BUY EARLY AND SAVE MONEY!**

Bookkeeping Departments

# BLACK HILLS HARDY ALFALFA SEED

## PROF. HANSEN'S SIBERIAN COSSACK ALFALFA

This hardiest and greatest producer of all Alfalfas was introduced from Siberia by Prof. Hansen of the South Dakota State College some years ago. Tested and retested in this country, it has consistently outyielded and outlived all other varieties. It makes the fastest growth and regrowth after cutting . . . is the heaviest yielding, grows late into fall . . . is finer stemmed with a high percentage of leaves compared with stems . . . continues heavy production as it ages . . . makes good crops of hay in dry seasons when other strains fail . . . is extremely resistant to winter killing. For more hay and longer lasting stands, plant COSSACK, the World's Finest Alfalfa.

30 lbs. \$21.60; 1 bu. \$42.60; 100 lbs. \$70.50

Sam Bober and a plant of Cossack alfalfa, showing the roots of this hardy special selected strain, containing "anti freeze." We have Cossack alfalfa fields of over 25 years old, that survive the hot dry summers and 35 below zero winter temperatures. You get the best seed value for your money here.

### NEW RANGER ALFALFA

Ranger is a result of crossing and recrossing Cossack, Ladak, Turkestan and Hardistan alfalfa; has quick recovery after cutting and is a high hay-producing variety in areas where three or more cuttings are made. It is resistant to bacterial wilt, cold and dry winter. Ranger permits longer rotations with alfalfa, and greater yield of forage.

1 bu. \$49.65; 100 lbs. \$82.25

### GRIMM-TYPE ALFALFA

A hardy alfalfa for midwestern farms. Good resistance to winter killing. Not recommended in areas where bacterial wilt bothers alfalfa.

1 bu. \$42.00; 100 lbs. \$69.70

### RANGER-COSSACK ALFALFA 50-50 MIXTURE

Combines wilt resistance with higher yield of best quality alfalfa. Starts growth earlier in the spring, grows late into fall . . . does well whether climate is moist and cool and stands hot weather of 115 degrees in the summer and 40 degrees below zero in winter.

1 bu. \$46.40; 100 lbs. \$76.85

### DAKOTA No. 12 ALFALFA

A native of the dry land in the Black Hills area of South Dakota. It is harder, more drought resistant and higher yielding than ordinary northwestern Alfalfa.

1 bu. \$41.40; 100 lbs. \$68.50

All our seed is free from noxious weeds. Prices on alfalfa include the cost of the bags and Free Inoculation with the seed if ordered on or before February 1

# NORTHERN GROWN SOIL BUILDERS

## Ten Reasons Why You Should Plant PROF. HANSEN'S SIBERIAN COSSACK ALFALFA

1. It is the hardiest alfalfa known; 2. A better soil builder than other alfalfa; 3. More drought resistant; 4. Will make a big crop of hay in a dry season when others fail; 5. Has a double root system, both branched and deep; 6. Makes finer quality hay; 7. Will yield more hay per acre no matter what the weather conditions are; 8. Freezing does not kill young plants, neither does it kill or injure the growing hay; 9. Requires less seed per acre than other varieties; 10. Hogs do not kill it out for pastures, as they do other strains. **COSSACK**, the World's Finest Alfalfa. Means more hay and a longer lasting stand. Purity 99 per cent, 90 per cent or more live seed. Dollar for dollar your best alfalfa buy.

1 bu. \$42.60; 100 lbs. \$70.50

## CORN EVERY YEAR

Instead of taking a year or two to raise a soil-building crop, plant 10 lbs. of Arizona or California, reasonable priced alfalfa seed per acre in your corn field after last cultivation. Have a heavy knee-high crop of alfalfa to turn under just before you plant corn on the same ground next spring. 1. You build up soil fertility; 2. Grow corn every year; 3. Double the yield of corn per acre.

## Premium grade ALFALFA Seed at reasonable prices

Many of our customers from Ohio, Indiana and other mid-west areas ask us for lower price alfalfa seed for 2 or 3 year rotations. For you who do not want seed for long years rotation, we can supply Arizona and California alfalfa seed 99.50 per cent purity, free from any foul weeds, 93 per cent live seed.

1 bu. \$23.75; 100 lbs. \$38.75

## Hardy FARM BELT ALFALFA

A mixture of Cossack, Grimm and Dakota No. 12 alfalfa seed, not as bright or as plump as the No. 1 grade described on page 3. Ninety-seven per cent purity, free from any foul weeds, 80 per cent live seed. Real value in northern hardy alfalfa seed.

1 bu. \$34.80; 100 lbs. \$57.50

## Best Northern DWARF SWEET CLOVER

Long recognized for its soil building abilities, this Biennial clover is becoming increasingly used as a pasture and green manure crop. Also efficiently combined with Crested Wheat Grass and Brome Grass to make a better hay and pasture and to prevent sod-bound grass conditions.

Yellow Dwarf Sweet Clover  
50 lbs. \$12.00; 100 lbs. \$23.75  
Tall White Biennial Sweet Clover  
50 lbs. \$12.60; 100 lbs. \$24.75

## HUBAM ANNUAL SWEET CLOVER CHAMPION SOIL BUILDER

Hubam Annual Sweet Clover is becoming more and more important to the farm rotation plan as the importance of the green manure crop becomes better realized. It produces a heavy top growth the first year, improves the soil, and makes an excellent beef pasture. Farmers report 10 to 25 per cent increase in corn and grain yields per acre after plowing under Hubam Clover. For quick grazing and soil improvements, plant 12 pounds of Hubam Clover seed per acre with your oats, wheat, or barley. You can harvest a grain crop and then plow your Clover without danger of volunteer stands in following crops.

50 lbs. \$12.50; 100 lbs. \$24.50

## Have You Discovered LADINO CLOVER?

This giant white clover is catching on fast. It has spread from the irrigated valleys of the West to the Northeast; then to the cornbelt and recently Southeast and to the Coastal Plains. All classes of livestock and poultry like it and thrive on it. . . . It teams up and does very well with Alfalfa and Brome grass for pasture and hay. The creeping stems of Ladino spread into bare spots where other legumes and grasses have failed. . . . Seed is very fine and it only takes one to two pounds per acre.

**5 lbs. \$10.00; 10 lbs. \$19.00  
Larger amounts \$1.85 per pound**

### STRAWBERRY CLOVER

Thrives on alkali soils. A perennial low-growing plant, it makes an excellent pasture on alkali land that does not tolerate other plants. Used successfully in irrigation districts to make useless land profitable. Plant 2 pounds per acre. You will be well pleased with results.

**1 lb. \$2.15; 5 lbs. \$10.00; 10 lbs. \$19.00  
Postpaid**

Ed Morgan, Fallon, Nev., in a newly planted field of Ladak and Cossack Alfalfa.

## ALFALFA AND CLOVER—BARGAIN

The best bargains in legumes for seedings to be left for two or more years are Alfalfa, Ladino Clover, and Birdsfoot Trefoil. This is true in spite of the fact that alsike and red clover seed may be cheaper by the pound, since red clover normally lives only one productive year while alfalfa lives and produces for years. Cossack-Ranger mixed alfalfa may be left for six years in mid-west and eastern states, and Ranger alfalfa for eight and ten years. The same may be said of Birdsfoot Trefoil and Ladino Clover, in which case the seed cost may be one-fifth the cost of Clover seed.

Here on the northern foothills of the Black Hills we have Cossack Alfalfa fields 20 and 30 years old—Alfalfa fields where weaker plants are eliminated by hot dry summers, and 30 below zero temperatures in the winter. You get the most value in seed for your money here.

## NEW BIRDSFOOT BROADLEAF TREFOIL

### A Legume That Lasts

Here's the kind of legume pasture cows dream about! As feed, birdsfoot trefoil is just as good as alfalfa and red clover. In pastures, it'll take a lot of heat, heavy grazing; has never caused a case of bloat. Plant 5 lbs. per acre. Also include it in pasture mixtures. Grows well in slightly alkaline soils.

**10 lbs. \$19.00; 25 lbs. or more \$1.75 per lb.**

### DWARF ESSEX RAPE FOR QUICK PASTURE

For a really quick pasture, Rape is hard to beat. It will prepare sheep or hogs for market better and in less time than any other forage plant, and also makes an excellent feed for cattle. Broadcast 8 pounds per acre. Large carrying capacity per acre.

**25 lbs. \$5.50; 50 lbs. \$10.50;  
100 lbs. \$19.75**

Mr. Bones with an armful of Cossack Alfalfa

# HARDY GRASSES FOR HEALTHY PROFIT

## SMOOTH BROMEGRASS—Outyields Bluegrass 2 to 1 Most Palatable of all Pasture Grasses

Smooth Bromegrass is a Giant Bluegrass—hardy and permanent and it roots deeply, sometimes 4 and 5 feet deep, making it stand dry and hot weather as well as the coldest winters.

It is the first green grass in the spring and the last in the fall and keeps green all summer when other grasses are dried.

All classes of livestock like it. Very palatable. It is important to seed it as early as the ground can be worked. Very little if any injury from frost.

Plant 15 to 20 pounds per acre, where it is seeded alone. Do not cover deeply— $\frac{1}{2}$  inch deep is sufficient. No. 1 seed, free from foul weeds.

**Lincoln Highest Yielding Bromegrass 50 lbs. \$15.50; 100 lbs. \$30.00**  
**Canada No. 1 Bromegrass 50 lbs. \$13.00; 100 lbs. \$25.00**

## CRESTED WHEATGRASS—The Miracle Grass Builds BEEF and MUTTON

A drought resistant, long lived perennial bunch grass introduced by Professor Hansen of South Dakota State College, who found it in Siberia from where he also introduced Cossack Alfalfa, as nearly perfect balanced diet as can be found in a plant.

Crested Wheatgrass becomes green in the spring earlier than other grasses and stays green later in the fall. It produces twice as much pasture and hay of high palatability and nutritive value as native grass. Produces twice as much beef, mutton, and wool and

shows no bad effect from heavy grazing. Broadcast 10 to 12 lbs. per acre.

For best results, plant some Alfalfa or Yellow Sweet Clover seed with it. This adds nitrogen to the soil which the Crested Wheatgrass needs. **Did You Know that Crested Wheatgrass contains as much as 35 per cent Protein when it is a young plant?** This explains the phenomenal gains on calves and lambs pasturing it . . . and why breeding cows and ewes do so extraordinarily well when allowed to pasture it in the fall. . . . Plant and Profit by it.

**Fairway, finer, leafier and more nutritious strain Crested Wheatgrass  
50 lbs. \$16.50; 100 lbs. \$32.00**

**No. 1 Standard Crested wheatgrass 50 lbs. \$14.00; 100 lbs. \$27.25**

Photo by the Black Hills Studio

Wheatgrass is not only the most profitable for beef cattle, but is also the best year 'round permanent pasture for production of wool and mutton on dry upland in west and southwest states

# *Announcing the Newest*

# **James HULLESS Oats**

***the newest answer to the need for a more perfect feed  
for poultry and pigs***

James, a stiff strawed, medium-early HULLESS oat at South Dakota's Experiment Station, has topped the standard oat varieties in yield. It stands up against leaf rust as well as Clinton and Mindo, and resists smut like Markton oats.

The new oat comes from the Nakota X Bond stock. It has more seeds on each spikelet than Clinton and Mindo. **In tests it made 6 to 11 bushels more feed per acre than Clinton and Mindo.** You'll like HULLESS Oats for poultry and hog feed. James Hulless oats are planted 30 to 50 lbs. per acre. You can harvest it with combine or binder and threshing machine.

Invest in a more **PERFECT FEED**, in a Higher Yielding HULLESS OATS.

**30 lbs. \$3.75; 50 lbs. \$6.25; 100 lbs. \$12.25**

**Early Maturing Feed Barleys that Yield More per Acre**

**PLAINS** is earliest maturing. Six rowed, smooth bearded stiff strawed, resistant to stem rust and drought. **\$2.30 per bushel.**

**FEEBAR** High-Protein, semi-smooth beards, early maturing and stands up good for combine threshing. **\$2.30 per bushel.**

**SPARTAN**, a smooth bearded, better protein than older varieties, drought resistant, heaviest weight feeding barley. **\$2.25 per bushel.**

We use four Sprinkler-Irrigation systems on 270 acres out of the 5,000 acres we farm on the Bober Seed Farms. Many crops can be profitably benefited by an application of water during a drought spell. If you have a source of water, we can help install a Sprinkler-Irrigation System on your farm. We have trained experts to do an efficient job for you. Address your letter to Bober Seed Farms, Newell, South Dakota.

# IMPROVED PASTURE AND HAY MIXTURES

## PERMANENT PASTURE AND HAY MIXTURE

### FIRST WE TOLD OUR CUSTOMERS— NOW THEY ARE TELLING US!

How much more palatable, more productive per acre, and more profitable they find our Year Around All Season Permanent Pasture and Hay Mixture.

We know it is very good and we know it is best value; that is why we recommend it to you as an excellent investment. 1. Once established, it does not have to be reseeded. 2. It is good insurance against pasture shortage due to seeding failures, or winter killing of certain crops intended for use as pasture. 3. It is a most effective means of controlling erosion. 4. It provides pasture in cold weather when other pastures are dormant. 5. It has two to three times the carrying capacity of ordinary pastures.

Plant about  $\frac{1}{2}$  inch deep, on firm land, early in the spring.

#### PASTURE A

For fertile land with sufficient rainfall or on irrigated land. Composed of equal parts: Smooth Bromegrass, Hardy Dryland Alfalfa, Crested Wheatgrass, and Domestic Ryegrass. Plant 16 to 20 lbs. per acre.

50 lbs. \$19.00; 100 lbs. \$37.00

#### PASTURE B

For land of medium fertility, and semi-arid regions, in western states. Composed of equal parts: Crested Wheatgrass, Dwarf Sweetclover, Smooth Bromegrass, and Domestic Ryegrass.

50 lbs. \$13.00; 100 lbs. \$25.00

## DOUBLE DUTY PASTURE

### "Miracle Twins" BROME and ALFALFA Produce Profits and Save Soil A Fifty-Fifty Mixture of Quality Seed

For years you've heard about "renovating" bluegrass—snapping it up with lime and legumes. Now experimenters are talking about a better system. It's called "conversion"—changing bluegrass over to more productive bromegrass and alfalfa. Both are very drought resistant. They supplement each other in a remarkable way. Pasture tested for an average of three years, an acre of Brome-Alfalfa produced 3,933 pounds of milk and had an average of 145 pasture days. Straight Alfalfa produced 3,606 pounds of milk and provided 124 pasture days. In another test the mixture pastured by HEREFORD STEERS GAINED 471 pounds beef per acre. Sow about 16 pounds of the mixture per acre.

50 lbs. \$25.50; 100 lbs. \$50.00, including bags

Herefords on Brome-Alfalfa Pasture

## GROW QUICK PASTURE MIXTURE

Here is an excellent mixture which will give you quick production of palatable pasture at a very low seed cost, and within a few weeks after sowing.

This mixture consists of equal parts of Sweet Clover, Ryegrass, Rye, and Dwarf Essex Rape.

The Ryegrass and Rye in this combination are the fastest growers and afford the earliest feed. Meanwhile, the Sweet Clover and Rape are developing to increase the pasture production and value. They will keep growing until after frost. The Sweet Clover and most of the Ryegrass of course live over winter and can be used the next year for plowing under, for continued pasture, or cut for hay.

Sow 20 lbs. per acre. Sow about the time you sow small grain. Do not use a nurse crop.

**50 lbs. \$9.00; 100 lbs. \$17.25, including bags**

### BROME-ALFALFA-LADINO MIXTURE

We recommend a mixture of 8 lbs. Brome, 7 lbs. Cossack Alfalfa and 1 lb. Ladino Clover per acre on good fertile land for greatest returns. Your Experiment Station recommends it, too.

**25 lbs. \$16.50; 50 lbs. \$30.00; 100 lbs. \$59.50**

Sam H. Bober in charge of the Bober Seed Farms on the Northern foothills of the Black Hills.

Sam pioneered the Brome-Alfalfa fattening pastures and helped introduce better yielding, disease resistant Seed Grain, Alfalfa and Grasses.

Sam was honored by South Dakota State College in 1950 for his contributions to agriculture.

### Sam Recommends . . .

For **MORE PROTEIN** . . . the most important nutrient commonly lacking in livestock rations . . . Plant **COSSACK** and **RANGER** alfalfa seed, 50-50 mixture . . . the nearest approach to **ALFALFA CROP INSURANCE**.

Bober's Improved **PASTURE "A"** described on page 8 or Brome-Alfalfa-Ladino clover mixture can double the output of your grassland. Here are pastures that put meat on your livestock; nitrogen and fiber in your soil and Money in Your Pockets.

**Pasture B** composed of equal parts of Smooth Brome, Crested wheatgrass, Dwarf yellow sweet clover and ryegrass produces two to four times the pasture and hay on upland compared with production of native grasses.

And lastly, enrich and improve the fertility of your soil by planting **Hubam Annual Clover** and **Biennial white or yellow dwarf sweet clover** with all your grain, and plow it under for greater yields of following crops.

A field of NORGHUM Sorghum grown on the Bober Seed Farms  
with the help of the Stout Sprinkler-Irrigation System

## NORGHUM Grow Two Where One Grew Before

Norghum is an earlier maturing combine grain sorghum developed by Clifford Franzke of the South Dakota Experiment Station for the needs of the western and Southwestern farms. The yield is higher than other varieties of grain sorghum because it is two weeks earlier maturing. Average yield 48 bushels per acre.

Norghum grows to a height of 36 to 46 inches. The seed cluster is long and open, which allows for drying of the seed, and is better than other compact types which often mold. The seed germinates rapidly and at low temperatures.

Norghum is a row crop to be cultivated like corn or cane and other milo varieties. FEED VALUE nearly EQUAL to CORN. Plant 4 to 6 pounds per acre.

**50 lbs. \$5.00; 100 lbs. \$9.50**

**Most dependable drylot forage**

## RANCHER SORGHUM

A South Dakota Experiment Station introduction that saves stockmen thousands of dollars by preventing losses from acid poisoning and gives us a **most dependable drought-resistant safe forage**. RANCHER SORGHUM is a hybrid developed by crossing and re-crossing Low Acid selections from Dakota Black Amber Cane.

This plant with its sweet leafy stalk has produced six and one-half tons of forage and 2,260 pounds of grain per acre, 25 per cent more than the Amber Cane alongside it.

**50 lbs. \$6.50; 100 lbs. \$12.50**

# **PROF. HANSEN'S PROSO GRAIN AND HAY MILLET**

We'd like to see you try Prof. Hansen's Proso Grain Millet in your ration. This high protein feed is necessary for heavy production. It will keep your chickens healthy and will produce many more eggs. Hogs fatten on Proso easier than on corn, because of its higher protein content.

A field of Proso that yielded 75 bushels of grain per acre

## **A Grain Crop in Sixty Days**

This Russian introduction yields fifty to eighty bushels per acre. It takes only sixty to seventy days to mature a grain crop. This is one of the most versatile crops in the country and can be grown everywhere, on dry land and on irrigated land, low land or upland. It can be cut for hay or matured for grain which makes a wonderful chicken food and can also profitably be used for fattening turkeys and livestock. We counted 1,500 kernels on one plant of Proso.

On dry land, plant twenty pounds per acre, any time from May 1 to August 1. In sections with better rainfall, plant it at the rate of 35 pounds per acre with a grain drill. Harvest the same as you do grain.

**10 lbs. \$1.50; 25 lbs. \$3.00; 50 lbs. \$5.50; 100 lbs. \$10.00**

**Mighty High in Goodness—Mighty Low in Price**

## **KURSK SIBERIAN HAY MILLET**

The most drought resistant hay producing plant in the Great Plains states. Produces a hay crop with less rainfall and in shorter time than any other plant. On dry upland plant 15 to 20 pounds of the millet seed per acre, any time from 1st of May to 1st of August.

**50 lbs. \$5.50; 100 lbs. \$10.00**

## **NEW SWEET SUDAN**

### **THE IMPROVED SUMMER PASTURE**

Sweet Sudan Grass has the grassy character of Common Sudan plus juicy sweetness that livestock want. Sweet Sudan grows taller than Common Sudan, has more and wider leaves, non-shattering seed head, and is resistant to drought and disease. No. 1 pasture for July and August.

**50 lbs. \$9.50; 100 lbs. \$18.00**

**Standard Sudan Grass, 50 lbs. \$9.00; 100 lbs. \$17.00**

# BOBER'S SEED CORN

**Bober's Northern Hybrids were top performers in 1949,  
the season of "no summer." Excellent performance  
under unfavorable conditions and best yielders  
every year.**

More farmers in western South Dakota, Wyoming and Montana plant Bober's Best Adapted Hybrids, and here's why:

Before offering any seed to customers, we test each Hybrid for comparative Higher Yield . . . Earlier Maturity . . . Meat making quality . . . clean and easy picking . . . and Higher Shelling percentage.

## HYBRID CORN THAT YIELDS MORE AND IS SMUT RESISTANT

**KF1**

**Highest Yielding 80-Day Maturity Hybrid  
most popular corn for dry land**

A cross between flint and early dent inbreds producing a semi-dent hybrid with the early maturity of Falconer . . . but with taller, leafier plants . . . more uniform ears . . . deeper kernels . . . larger yield . . . Grows rapidly at low spring temperatures, allowing early cultivation. . . . Produces tall non-suckering plants with unusual stalk strength and high ear placement. . . . Profitable for ear corn, cutting, bundle corn feeding, silage and pasturing.

**½ bu. \$6.40; 1 bu. \$12.15**

**KE3**

The earlier pure yellow dent . . . matures in 80 days. . . . Produces a big sturdy plant, with plenty of wide green leaves . . . ears placed high . . . at uniform level for easy mechanical picking. Big yields of both grain and fodder. Regular Flat Kernels.

**½ bu. \$6.40; 1 bu. \$12.15**

**KE2**

A pure yellow dent of beautiful ears . . . 85-day maturity. . . . Has the same rapid plant development under all kinds of spring conditions. . . . Large plants with many large leaves, well placed ears, and stalks that stand up. . . . Husks open early in fall . . . permitting early drying and safe cribbing. . . . Large ears . . . with fully dented kernels. . . . Easily picked by machine or by hand. Here is a Hybrid that matures early every year in short season country.

**½ bu. \$6.40; 1 bu. \$12.15**

**KE1**

Approximately the same maturity as the Haney strain Minnesota No. 13 . . . makes a beautiful field of dark green plants with ears that ripen while plants are still green . . . it picks on dry days when other hybrids cannot be picked . . . and because of early drying it can be safely cribbed ahead of other corn. Regular Flat Kernels. . . . 90-day maturity.

**½ bu. \$6.40; 1 bu. \$12.15**

## HIGH YIELDING — EARLY MATURITY

### Bober's No. 241—Special Hybrid Corn

Bober's No. 341 especially recommended for fertile well watered land. Better provide more crib room.

A 90-day Beautiful Yellow Dent Hybrid with tremendous eye appeal in the field, wagon box and crib. Large plants, high ears and a stalk that stands up, winner of the Silver Trophy for highest yield per acre. Just cob enough to hold the kernels together. Survives cold springs and ripens before earliest frosts. What better recommendations?

**½ bu. \$5.50; 1 bu. \$10.00**

**DON'T GET CAUGHT SHORT  
ORDER ALL SEED EARLY**

### AMERICA'S HIGHEST YIELDING HYBRIDS OF EARLIEST MATURITY

**GIVE YOU COLD RESISTANCE,  
WIND RESISTANCE AND MOST  
DROUGHT, PEST AND DISEASE  
RESISTANCE**

Hybrid Corn

### WHEATLAND—A Blend of Extra Early Hybrids for pasturing off, silage and grain at low cost

An outstanding development in seed corn. . . . Because only the four earliest Hybrids are included. . . . Wheatland produces more mature ears . . . and better feed than ordinary fodder corn. . . . Produces a mature crop of grain on sturdy stalks that stand up for mechanical picking . . . used by cattlemen to pasture off and fatten steers in the field. . . . Wheatland Blend is made up of round kernels suited to planting with standard drill plates or grain drills.

**\$7.00 per bu.**

### BOBER'S OPEN POLLINATED SEED CORN for Western Lands

Recommended for dry land with limited rainfall . . . short season . . . higher altitudes.

**Gehu Flint**—70-day corn—unexcelled for hogging and sheeping off, drought, frost and hail resistant. Its feeding qualities the highest of any corn, because of high oil content.

**\$6.50 per bu.**

**Falconer**—75-day yellow semident—the best yielding of early maturing, open pollinated corn. Also used for hogging and sheeping off.

**\$6.00 per bu.**

**Payne's White Dent**—80-day corn—record yield of 91 bushels per acre, a consistent good yielder. Also used for hogging off.

**Black Hills Special**—85 to 90 days, higher yielding yellow dent.

**Early Minnesota No. 13 Yellow Dent.**

**Squaw Flour Corn**—80-85-day maturity.

**Early Northwest Dent** (red and white cap)—Leafy, 85-90-day corn.

**Rainbow Flint**—Highest yield for silage corn, for open pollinated corn.

Price for above 5 varieties of seed corn including bags:

**½ bu. \$2.90; 1 bu. \$5.25**

# OATS

## BRUNKER OATS No. 2054 is still champion

in the West and in the great Southwest. When planted real early, the Brunker Oats outyield all other varieties we have planted alongside them in variety trials. The record of 107 bushels per acre they made here a few years ago still stand at top, especially on non-irrigated land. Brunker Oats are frost resistant . . . they are also smut, rust and helminthosporium resistant . . . they are the **EARLIEST MATURING** and **HIGHEST YIELDING** in Great Plains states . . . the most bushels per acre in heavy weight oats. Oklahoma and Texas customers use our Brunker oats for growing Winter Oats outyielding other kinds. High altitude oats full of Vim, Vigor and Vitality.

**10 bu. \$18.00; 20 bu. or more, \$1.75 per bu., including bags**

A field of certified Brunker Oats on the Bober Seed Farms

## Early Maturing and High Yielding **MINDO OATS**

acre than any of the other new and slightly later maturing varieties. We recommend Mindo Oats for mid-west farms. Mindo Oats raised in the north will give you extra disease resistance and more bushels per acre.

**10 bu. Mindo Oats \$17.50; 20 bu. or more \$1.70 per bu.**

### Announcing the Newest **James HULLESS Oats**

This new HULLESS Oats was developed by the South Dakota Experiment Station to fulfill a demand for a disease resistant, high yielding Hulless Oats, which is an ideal feed for pigs and poultry.

James HULLESS Oats was derived from the cross of (Bond X Double Cross Bond) X Nakota. It is medium maturity, average height 33 inches, stiff strawed, moderately resistant to stem rust and leaf rust. It is resistant to helminthosporium foot-rot, and to the oat smuts. **It outyields standard varieties.** On our own land we plant 30 pounds James Hulless Oats seed per acre. We have had hulless oats before, but this is first time we have a real disease resistant and **HIGH YIELDING HULLESS Oats**, which we highly recommend. Be the first in your neighborhood to grow it.

**30 lbs. \$3.75; 50 lbs. \$6.25; 100 lbs. \$12.25**

## KINDRED or 'L' MALTING BARLEY

For Cash Crop

(1) Early Maturing; (2) Heavy Yielding; (3) Stem-rust Resistant, and (4) BEST MALTING QUALITY. Adapted to Central and Northern Iowa, Nebraska and South Dakota.

Based on their performance, Kindred and Moore barley were recommended as most satisfactory of all malt barley varieties by the Malt Research Institute.

**\$2.35 per bu., including bags**

## Newest MOORE MALTING BARLEY

Six-rowed, smooth awned, mid-tall. Mellow kernel, resistant to lodging. Resistant to stem-rust, spot blotch, foot rot, and mildew. Outstanding malting quality—high yielding.

Our customers from Iowa, Minnesota, South Dakota, Wisconsin, Illinois and Michigan report highest yields and large cost returns per acre.

**\$2.50 per bu., including bags**

## FEEBAR HIGH-PROTEIN BARLEY

INTRODUCED BY SOUTH DAKOTA STATE EXPERIMENT STATION

(1) Earlier Maturity; (2) Higher Yield on Dry Land; (3) Semi-smooth Beards; (4) Stands up good for Combine Threshing and (5) Higher Protein which makes a more profitable barley to feed.

**Price, \$2.30 per bushel, including bags**

## PLAINS the 'Heads Up' Barley

A new six-rowed, smooth-awned, EARLY MATURING, short growing, stiff strawed, feed type barley. Resistant to stem rust and drought. Best adapted to central and northern sections of Iowa, Nebraska, Wyoming and South Dakota. Introduced by the South Dakota Experiment Station. In the past two years of moderate and below average rainfall, it has produced the most bushels of feed barley on our farms. Combines good.

**\$2.30 per bushel**

## SPARTAN BARLEY

A favorite on the semi-arid farms in the Great Plains states. Drought resistant, EARLY MATURING, high protein and highest weight per bushel (nearly as high as corn). One of the highest yielding varieties on dry lands for western and southwestern farms.

**\$2.25 per bushel**

# WHEAT

Sam Bober in a field of New Rushmore wheat

## RUSHMORE—Newest Spring Wheat

Earliness, Stiff-Straw, Resistance to Shattering and good yield are some of the reasons for South Dakota Experiment Station's latest introduction.

This new beardless, disease resistant, high milling quality wheat, combines the good points of standard varieties, Pilot, Rival and Mida and less of their undesirable qualities. Supplies are limited—Order without delay.

**5 bu. \$19.25; 10 bu. \$38.00; 20 bu. or more \$3.75  
including extra heavy seamless bags**

## MIDA SPRING WHEAT

Strong in straw, early heading, high in protein, highest in test weight. Resistant to smut and stinking smut. Resists Hessian fly damage. Excellent milling quality.

**5 bu. \$17.00; 10 bu. or more at \$3.35, including bags**

## SHEYENNE FLAX

### a top quality CASH CROP

Highest yielding and earliest maturing variety of Flax for dry land. Matures a week to ten days earlier than other varieties and is more disease resistant. **The best CASH CROP and the best NURSE Crop to plant with alfalfa and grass seed.** One bushel plants 3 acres of dry land. Plant  $\frac{1}{2}$  bu. per acre on fertile land.

**5 bu. \$26.75; 10 bu. or more at \$5.25 per bu., including bags**

## REE WHEATGRASS Green Pasture All Summer

**for Cattlemen—for Sheepmen—for Seed Growers**

Ree Wheatgrass is a South Dakota Experiment Station selection of Intermediate Wheatgrass. Vigorous seed, germinating within a week, producing fast growing seedlings. . . . Plants begin growing early in the spring reaching height of 3 or 4 feet by midsummer. **REE is a PERENNIAL SOD FORMING GRASS which spreads by means of creeping root-stocks . . . stays green throughout the summer.** Leafy . . . relished by all classes of livestock. . . . Plant 4 to 6 pounds per acre on firm seedbed.

Produces **HEAVY PASTURE . . . Nutritious Hay . . . CASH SEED CROP.**

**5 lbs. \$7.00; 10 lbs. \$13.50; 25 lbs. \$32.00; 50 lbs. \$63.00; 100 lbs. \$125.00**

1/4 lb. \$2.00; 1 lb. \$6.50

**KLECKLEY'S SWEET**—Early maturing, sweet and large.

Pkt. 5c; oz. 15c

French Breakfast Radish

Bober's Kleckley's Sweet Watermelon

Earliana Tomato

## **BOBER'S 30-DAY RICHGREEN LAWN GRASS**

**For a Beautiful Lawn  
All Season**

Order Bober's "30-Day Lawn Grass" early and sow it as soon as the snow melts away in early spring. Sow one pound to 250 square feet and you will have a well established lawn by early summer. This mixture consists of fine leaved and deep rooted perennial grass and some White Dutch Clover, which assures a beautiful rich green lawn thick and free from weeds.

Unsurpassed for open sunny spaces. Adapted to areas of moderate shade.

**1 lb. \$1.10; 3 lbs. \$3.00;  
5 lbs. \$4.85; 10 lbs. \$9.50,  
postpaid.**

**Richgreen Lawn Grass**

## **HIGH QUALITY PURE KENTUCKY BLUEGRASS SEED**

**1 lb. \$1.00; 5 lbs. \$4.75; 10 lbs. or more at 90c per lb., prepaid**

## **WHITE DUTCH LAWN CLOVER—Extra Fancy Seed**

**1 lb. \$1.35; 5 lbs. \$6.35**

*For Dry Land Lawns*

## **FAIRWAY STRAIN OF CANADIAN CRESTED WHEATGRASS—**

A very hardy, leafy grass easy to start if planted real early in the spring because it germinates better in cool, moist weather. Plant at the rate of one pound to 300 square feet.

**75c per lb.**

## **BUFFALO GRASS**

**Makes Wonderful Lawns in Dry Climate Regions**

In the lighter sandier soils, and the dry and semi-dry regions Buffalo Grass has proven highly desirable for lawn use. It is a low growing plant, seldom getting over 6 inches in height; hence needs no cutting and requires very little care. Our seed is treated and scarified to make it grow quicker. Since it is spread from underground root stocks, as well as from seed, once you get a thin stand established, it thickens up all by itself.

**1/4 lb. 65c; 1/2 lb. \$1.20**

**One pound covers 3,000 square feet. \$2.00, Postpaid**

## **HOTKAPS Help You Grow Earlier and Hardier Vegetables**

### Your Best Crop Insurance . . .

## CLIPPER ROCKER SEED TREATER

This remarkable new machine will treat up to 120 bushels of grain per hour with Ceresan, or other chemical.

There are no shafts, bearings, gears, or belts to require lubrication or maintenance and no complicated mechanism to get out of order. The coating of the seed is thorough and absolutely exact, as each 1/30 bushel of seed measures its own coating charge and applies it to itself in its downward course through the mixing chamber.

It's AUTOMATIC—No power required.

Use this Seed Treater with your No. 2B Special to clean and treat your grain in one quick, easy operation.

Price: \$65.00
